3595 Airway Drive, Suite 408		ART UNIT		
Reno, NV 89511-1845		PAPER NUMBER		

2112

DATE MAILED: 08/22/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/038,493	<b>Applicant(s)</b> QIU, MING	
	<b>Examiner</b> Kim T. Huynh	<b>Art Unit</b> 2112	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 30 May 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 15 and 18-30 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 15 and 18-28 is/are rejected.
- 7) ☒ Claim(s) 29-30 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 31 December 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15, 18-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wachel (Pub. No. US2040148448) in view of Hill et al. (US Patent 6,578,103)

As per claim 15, Wachel discloses a high-density server (fig.1, 100 ie system 100) comprising:

a midplane board (fig.1, 110) having opposing front and back sides;

(paragraph 34)

multiple processor cards (fig.1, 119 ie main cards) physically and electrically connected to the midplane board; (paragraph 36-37)

multiple network control cards(fig.1, 116 ie switch card) physically and electrically connected to the midplane board; and (paragraph 36-37)

multiple power supply cards (paragraph 37) physically and electrically connected to the midplane board wherein the multiple processor cards, the multiple network control cards and the multiple power supply cards are connected to the midplane board via CompactPCI connectors (paragraph 29-31)

Wachel discloses all the limitations as above except wherein the at least some of the multiple processor cards have pinout definitions the mirror image of

J1 CompactPCI front side pinout definitions. However, Hill discloses certain compactPCI boards may be devoid of a connector or mating portion, at a J4 location that would otherwise be coupled to a P4 connector. The backplane is configured in such way that compactPci boards devoid of J4 connectors are still compatible with the backplane and may be used in the system similarly to compactPCI boards that include a compatible connector at the J4 location. (col.3, lines 45-65)

It would have been obvious to one having ordinary skills in the art at the time the invention was made to incorporate Hill's teaching into Wachel's system so as to provide a bus architecture that is compatible with existing PCI and compactPCI hardware that can transfer much larger amounts of data than currently available to allow more users to use a single system. (col.2, lines 5-12)

As per claim 18, Wachel discloses wherein pin connectors are attached to the midplane board and socket connectors are attached to the multiple processor cards, the multiple network control cards and the multiple power supply cards and wherein pins of the pin connectors are secured into sockets of the socket connectors to physically and electrically connect the multiple processor cards, multiple network control cards and multiple power supply cards to the midplane board. (paragraph 29, 31-33)

As per claim 19, Wachel discloses the high-density server further comprising a KMV switch physically and electrically connected to the midplane board.  
(paragraph 35)

As per claim 20, Wachel discloses the high-density server further comprising multiple fiber channel hard drive cards physically and electrically connected to the midplane board. (paragraph 37)

As per claim 21, Wachel discloses wherein the multiple network control cards are selected from the group consisting of a network switch, a network hub, a fiber channel arbitrate loop hub and a fiber channel arbitrate loop switch. (paragraph 38, ie switched Ethernet)

As per claim 22, Wachel discloses wherein at least one of the multiple processor cards controls at least two expansion cards through a J1 portion of the Compact PCI connectors. (paragraph 35)

As per claim 23, Wachel discloses the high-density server further comprising conductive traces extending along the midplane board to electrically connect the multiple processor cards, multiple network control cards and multiple power supply cards through J2 portions of the CompactPCI connectors. (paragraph 29)

As per claim 24, Wachel discloses wherein the multiple network control cards control through the J2 portions of the CompactPCI connectors a network formed from the multiple processor cards, multiple network control cards, the multiple power supply cards and the connecting conductive traces. (paragraph 29, 31-33)

As per claim 25, Wachel discloses wherein the conductive traces connect the multiple processor cards, multiple network control cards, and multiple power supply cards in a daisy-chain or a star network configuration. (paragraph 29, ie network communication links)

As per claim 26, Wachel discloses the server further including a chassis enclosing the midplane board, the multiple processor cards, the multiple network control cards, and the multiple power supply cards. (paragraph 29)

As per claim 27, Wachel discloses wherein the processor cards, the network control cards and the power supply cards are hot swappable so that any of the cards can be replaced without shutting down the network. (paragraph 28)

As per claim 28, Wachel discloses wherein the network will continue to operate even if any one of the multiple processor cards, the multiple network control cards and the multiple power supply cards fails to operate. (paragraph 28, 40)

***Allowable Subject Matter***

3. Claims 29-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior arts fail to teach or suggest wherein the front and back sides of the midplane board are substantially rectangular with a longer edge of the rectangle defining an x-axis, the multiple processor cards have a processor card front and a processor card backside, wherein the shorter edge of the multiple processor cards defines a y-axis; and wherein at least some of the multiple processor cards are physically connected to the midplane board in a vertical configuration so that the y-axis defined by the shorter edge of the multiple processor cards is substantially perpendicular to the x-axis defined by the longer edge of the midplane board.

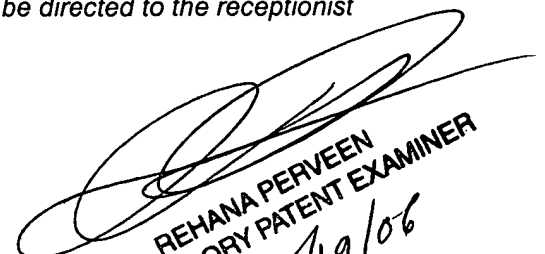

***Conclusion***

4. *Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim Huynh whose telephone number is (571)272-3635 or via e-mail addressed to [kim.huynh3@uspto.gov]. The examiner can normally be reached on M-F 9:00AM- 6:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rehana Perveen can be reached at (571)272-3676 or via e-mail addressed to [rehana.perveen@uspto.gov].*

*The fax phone numbers for the organization where this application or proceeding is assigned are (571)273-8300 for regular communications and After Final communications. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571)272-2100.*

Kim Huynh
